

MEB, Vice President

David graduated from the Building Construction Program at Virginia Tech in 1993 and began with MEB upon graduation. He specializes in water and wastewater treatment plants and complex industrial and food processing projects. David has significant experience as a Project Executive on Fast Track Design-Build projects and is a DBIA-Certified Professional. David has completed projects under design-bid-build, design-build, PPEA, and CMAR delivery platforms.

Previous Design-Build projects include water treatment plants, wastewater treatment plants, water/wastewater conveyance systems, and industrial and food service plant expansions. Previous projects have been completed for HRSD, City of Richmond, Smithfield, Norfolk Southern, Philip Morris, United States Navy, and the Army Corps of Engineers.
